Cara McLane, Contracts Officer		323-221-9944, x117	
<i>Name and Title</i>		<i>Phone</i>	
<b>Person with day-to-day responsibility for project:</b>			
Stephanie Landregan, Chief Landscape Architect		323-221-9944, x184	
<i>Name and Title</i>		<i>Phone</i>	
<b>Brief Scope of Work</b> (60 words maximum): Project planning and design for the development of a concept report and studies for submission to City of Los Angeles Proposition O funding for the Hansen Dam Recreational Area Parking Lot and Wetlands Restoration project.			
<b>Funding Source Applied for:</b> Proposition 50			
<b>Narrative/Project Description:</b> The Hansen Dam Recreational Area Parking Lot and Wetlands Restoration Project proposes the installation of bioswales, sand filtration systems and treatment wetlands to capture, treat and reuse wet and dry weather flows from three parking lots at the Hansen Dam Recreation Area. Currently, untreated stormwater and dry weather urban run-off from the parking lots drain to sensitive riparian habitat at Hansen lake that is occupied by numerous special status species, including multiple breeding pairs of the least Bell's Vireo ( <i>Vireo bellii pusillus</i> ). The project would redesign and resurface portions of one parking lot and redirect flows from this and two other parking lots into a complex of bioswales, sand filtration systems and a treatment wetland.  Proposition O, approved by City of Los Angeles voters on November 2, 2004, authorized \$500 million of bonds for projects to protect public health by cleaning up pollution, including bacteria and trash, in the City's watercourses and waterbodies. In addition, the measure will fund improvements to protect ground water quality, provide flood control, and increase water conservation, habitat protection, and open space. In order to secure Proposition O funding for implementation of the project, additional studies and project development is required.  The MRCA requests that the term of agreement begin August 1, 2006 and end no earlier than June 30, 2008.
